Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement:**

Novelty (N)	Claims	1-9	YES
	Claims	None	NO
Inventive step (IS)	Claims	2,6-8	YES
	Claims	1,3-5,9	NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims	None	NO

2. Citations and explanations (Rule 70.7)

The closest prior art is represented by document cited CN1227780A (D1).

The difference between said D1 and the art scheme claimed in claim 1 is that, a traction means connected with a shaft may make said shaft rotate, so that the second gear could drive the first gear, and cause said worm move inside said chamber. However, said difference has already been disclosed in CN2139873Y (D2, see Fig 1,2 and reference numbers 3,5,6,10,15). Therefore, it is obvious for skilled persons in the art, to combine the Document 2 on the basis of the Document 1, so as to achieve the art scheme claimed in claim 1, claim 1 does not satisfy the criteria set forth in PCT Art. 33(3), hence involving no inventiveness.

At the same time, the additional technical features of dependent claims 3-5,9 have also been disclosed in said D2. Hence, in the condition that the claim 1 they refer to does not possess inventiveness, claims 3-5,9 don't satisfy the criteria set forth in PCT Art. 33(3), hence involving no inventiveness.

Because the subject matter of claims 1-9 involve industrial applicability, claims 1-9 meet the requirements of PCT Art. 33(4), indeed.
